APPLICANT : MURATA MACH LTD;

INVENTOR : ASAI SHINJI;

INT.CL. : H04N 1/00

TITLE : FACSIMILE EQUIPMENT

ABSTRACT : PURPOSE: To obtain a facsimile equipment which is reducible in misoperation without spoiling the outward appearance.

CONSTITUTION: Various operation keys 21 are provided on the top surface of a panel 3, and a cover 25 is provided with subordinate operation keys 27 facing speech function keys 21 that are high in use frequency among operation keys of the panel 3 when the cover is closed. Consequently, the cover 25 is normally closed to shield the speech function keys 21, keys dedicated to the facsimile function, etc. At this time, even when the respective keys 21, 23, and 24 are covered with the cover 25, the subordinate operation keys 27 of key rubber 26 face the speech function keys 21 which are high in use frequency, so the speech function keys 21 can be pressed even while the cover 25 is closed. Consequently, when a telephone call is made, the cover 25 is closed and then a user never operates a facsimile function key by mistake.
